## **“A Magic, Little-Known Piece of News That Makes A Stock Go Up Over the Next 3-6 Months After It’s Release – 86% of The Time!”**

Preston “Pirate” James  
Stock Market Trader

*“But before I tell you exactly what that little-known piece of news is, I need you to realize that I’m not some big-shot stock market guru. I’m not some high-falutin’ newsletter writer... it’s just me...”*

*“And I’m simply a normal guy with 9 years of trading experience who has, for the last 4 years passionately zeroed-in and perfected perhaps **the single greatest (and safest) way to make money in the stock market.***

*“And during this 4 years, half of it has been in a bull market, and half of it in a bear market – and as you’ll soon see, **you can make money no matter what the stock market is doing in general... even if we’re in the middle of WAR!**”*

### **You’ll Profit From My Stock Trading System – Or You Get Your Money Back!**

*— Preston James*

Dear Investor Looking For Consistent Profits,

In a minute I’ll tell you exactly what this “magic” piece of news is that you read about in the first letter I sent you... but make no mistake – it’s 100% true ... it really does make a stock run up 86% of the time over the following 3-6 months.

And get this:

Hundreds and hundreds of companies announced this “magic” piece of news during the year 2001. **And 2001 was absolutely one of the worst stock market years ever!**

And yet, if you followed this “magic” piece of news – you would’ve cleaned-up in 2001! Think about that... in one of the worst stock market years ever – YOU could’ve cleaned-up with this simple little strategy.

Now if you stop and think about it, you’ll logically come to the conclusion that if this strategy works well in a market like 2001 – you know it’s gonna kick-butt in a “normal” year!

And it does!

In fact this year alone, the track record has been really amazing. Take a look at my actual trades since May 16<sup>th</sup>, 2003 and the results from using this “magic” piece of news:

*(IMPORTANT: please understand... I’m not sharing my trades with you to “brag”. I just think you should get to know someone’s track record before you even consider doing business with them!)*

- On May 16, 2003 **I made** +156% in 2 Weeks... +\$5,600 on OVTI
- On May 16, 2003 **I lost** -75% in 2 Weeks... -\$1,200 on CYBX

*(please turn over now to continue...)*

- On Aug 28, 2003 **I made** +48% in 8 Days... +\$1,900 on RCII
- On Aug 29, 2003 **I made** +100% in 2 Days... +\$2,250 on APOL
- On Sep 17, 2003 **I lost** -27% in 3 Weeks... -\$700 on BBY
- On Sep 18, 2003 **I made** +119% in 7 Days... +\$4,350 on BSX
- On Sep 23, 2003 **I made** +25% in 7 Days... +\$800 on SNPS
- On Sep 25, 2003 **I made** +88% in 3 Weeks... +\$3,000 on SINA
- On Sep 25, 2003 **I made** +46% in 3 Days... +\$1,350 on RIMM
- On Oct 3, 2003 **I made** +163% in 3 Weeks... +\$5,200 on NFLX #1
- On Oct 3, 2003 **I made** +163% in 3 Days... +\$5,200 on NFLX #2

So since May, that's 39 trades, 5 losers, 34 winners... for a net profit of \$83,750 not counting commissions. This isn't taking into consideration multiple contracts, and other factors that would increase the rate of return.

Just imagine what an additional \$83,750 would do for you this year. And it's all what I call "conservative trading"... every bit of it. In fact, it's almost "no-brainer" trading. Understanding this magic piece of news and how to take advantage of it will make you a happy, satisfied player in the market.

Think about how confident and effortless it'll feel as you trade that next stock with this information in

*(go to next page now to continue...)*

your hands! **Imagine the faces of your spellbound friends and family as you keep getting in and out of stocks at the exact RIGHT time!** (*That'll be nice for a change, right?!*)

**And imagine spending ZERO time on:**

- Boring and **tedious** fundamental analysis
- Confusing “voo-doo” technical indicators and expensive charting fees
- **Getting dizzy** from watching forty different real-time quotes tick up and down... up and down...
- Feeling guilty because you can't watch a stock every second while you're busy at work
- **Listening to shifty stock analysts** (the stock cartel) trying to manipulate you with their “strong buys” and other nonsense ratings (*only to secretly slam these same stocks behind closed doors, ala Merrill Lynch!*)

You don't need to waste your time with things like this any more. I certainly don't... in fact, I hate charts, I hate technical analysis, I hate fundamentals, and I definitely hate stock analysts!

**All that stuff gets complicated.** You get different experts telling you different strategies... and they *ALL* supposedly work... as long as you do it THEIR way. Which, without a doubt, is so complicated it'd take a rocket scientist to figure it out.

It seems to me that the current trend is to make things more difficult and complicated. Why is it the most simple and obvious things are the most over-looked...?

Anyway – there's absolutely nothing complicated about this “magic” piece of news and the way I trade it. It'll make perfect sense to you – and **I'm going to show you HOW I trade it, WHY it's so TIMELESS and WHY it's the perfect strategy to use in an increasingly un-predictable, fast-moving, and NON “buy and hold” world!**

Because in case you haven't yet realized it....

## **20th Century Investing Is Dead!**

There's absolutely *NO GOING BACK* to the way things once were!

“Buy and Hold” is a distant, fading memory. The world is moving *way too fast* today – faster than anyone could've ever imagined or predicted.

That “widow and orphan” stock your Dad said you could retire on can now **get pummeled in an afternoon** with a heart-dropping accounting scandal (thanks to greedy, 30-something CEO's that have cooked the books)...

That other “can't lose stock” you've been hanging on to for 3 years can get *SLASHED IN HALF* because some idiot sniper seems to keep shooting people outside it's stores...

Yet another “safe bet” goes up in flames as you learn the stock analysts that have cried “buy, buy, buy” have really been sleeping with the enemy – saying anything to get you to buy the stock while back-room deals were cooked-up to sell for mega-million dollar fees...

**Investors and traders today haven't seen it this HARD to make money in the last 30 years!** Even once-happy investment club grandmas have thrown up their hands in disgust – quitting their clubs, tired of losing money... wondering when it will all get back to “normal”.

And if that's not bad enough – today our news is **INSTANT** – we're drowned in a sea of TV stations, internet pages, wireless devices, phones, media outlets and **NOISE** – and it just gets worse! Everyone's demanding your attention, chiming-in with their opinion – and it's more confusing than it's ever been! That's

*(turn over the page to continue now...)*

why I've created something simple for a change. It's called:

## **“The Buried Treasure Trading System”**

“The Buried Treasure Trading System” is absolutely guaranteed to get you making money in the stock market, or you get your money back. (*More on that later*). Why do I call it “buried treasure”? Because it continually finds the profits that are “hidden” from the masses who are too busy chasing analysts recommendations that they overlook the obvious, “buried treasure”.

Let me share a quick story with you to illustrate the importance of getting your hands on this inside information so you can start to make serious money in the market for a change... it's a typical “behind the scenes” story about what happens when most normal folks try their hand at trading.

See if you can find yourself in this story...

### **The Morning After**

Jeff at the office always had “that way” about him. Almost an effortless way of getting any project done . . . what for me is a pain in the ass, Jeff breezes by it while making new friends, laughing and enjoying life.

He also (from what I've heard) is a very successful trader. I had no reason to doubt this from the way he dressed, the traveling he said he'd done, the neighborhood he lived in, the Lexus he drove and on and on.

Me?... I've just played around in the market here and there, dinkin' around with calls and puts when I sensed some “action”! I've always been able to accomplish goals in my life... graduated college and by no means had a bad station in life... it's just with trading I see all the money going back and forth, stocks taking off like rocket ships and others getting slammed ruthlessly...

...it hooked me instantly!

After finishing college and having a few years of the “real world” under my belt, I was learning more and more about companies, contracts, earnings and I wanted to capitalize on it.

And with constantly changing prices and the leverage options offer, that game had my name written all over it!

So to say that “stock talk” during slow times at the office or at lunch sucked me in like iron filings to a large, super-charged magnet, would be an understatement! I naturally wanted to hear everyone's opinion and especially what their respective brokers had to say.

Several names of stocks would fly around... the whisper number for Dell's upcoming earnings, a pharmaceutical merger falling apart, all the retailers seeming to do stock splits, the nice rear-end of the new girl that just started 2 weeks ago! (You know, “guy stuff”!)

But no matter the deals flying around, **I always added extra weight to what Jeff had to say** – something told me to just do what he did – I just had a feeling from the whole “image thing”.

Prior to this, I was probably dead-even after 5 months of trading. I had 2 huge scores, a big loss, and lots of little trades in between.

What was killing me most, looking back, were the trades that made me say “I could've made \_\_\_\_\_ on that one!” (It's the money I “could of” made because of selling out too soon and always regretting it instead of what I *actually* made that was driving me crazy!)

So, when I found out Jeff played around in the market too, it instantly made me want to tag along and listen in! **“HE SAID THE PLAY WAS APPLIED MATERIALS . . .”** So it goes without saying during a recent slow time, I heard him go on and on about Applied Materials (AMAT). His broker said it had the best

*(go to next page now to continue)*

balance sheet he'd ever seen, they're coming up on a stock split, the sector was looking strong and how a 4 month outlook looked like a \$20-30 move to the upside. The 4-month out, slightly in the money calls were going for around \$ 9.75.

Drowning everything else out as I did some quick "unbiased" research, I came to the conclusion this one was right and ready to pounce on. \$ 9.75 was maybe a tad steep, but this was Applied Materials we were talking about.

**(Actual journal entries that mention this trade):**

**Wed. 9:45 a.m.** - The tech sector pulled back a little as Greenspan was rumored to speak before Congress. What I liked 2 days ago at \$9.75, had backed off to \$9.40. I bit and got 10 contracts faster than it takes for a Manhattan cabbie to honk after the light turns green!

**Fri. 11:05 a.m.** - Saw AMAT fly across the bottom of the CNBC screen at \$2.50 higher than where I bought it! The options, I found out from my broker, marched ahead an even \$1.00! I thought to myself, with 4 months to go – and everything looking chipper, I could see a double on these bad boys! My mind RACED!

"Let's see, an extra \$9 GRAND would be a nice down payment on that Dodge Durango my wife has her eye on... or we could extend our kitchen out and add that deck off the back porch we've been wanting to do. Or maybe even better... a pair of Yamaha snowmobiles would fit the bill!"

**Thurs, 2:20 p.m.** - AMAT has been in the top 10 most active list all last week, it's up another \$3 from where I bought it, so I've got a \$5.50 move in about 10 days time! The options are now \$12.20 x \$12.50 and I contemplate bailing today.

It would be a real nice profit, especially for 10 days of "work" – but I do have 3 1/2 months left with my strike price now being in the money by \$5 bucks!

(If I sell today, in 3 months, and after a stock split, I'd be looking back and think what an idiot I was for selling then! In 3 months, these option profits could be gigantic - maybe even tripling in value! I'll sit tight for now.)

**Mon, 8:30 a.m.** - The overall market's doing okay, AMAT has been a little choppy in the last few days before it's going to split. I look at the 3-year chart again and it resembles nearly a 45-degree angle interrupted by 2 stock splits.

The overall long-term trend is intact and I'm still up about \$3.25 on my options. (Companies in the same sector like Intel, Micron and AMD seem to be in stable up-trends).

**Wed, 10:20 a.m.** - It's the 1st day after the split and AMAT is trading down \$4.00, that adjusts to an \$8 move before the 2:1 split! I check the news and nothing. This has got to be something very temporary, there's no way a good company like this could tank so suddenly and especially after just splitting!

**Thurs, 9:32 a.m.** - 2nd day after split, AMAT opened down \$ 5.80! That's almost a \$12 move pre-split! My options are going for \$5.20! What the hell is happening here!!! It's GOT to go BACK UP!

**Fri. 10:14 a.m.** - AMAT opened \$1 lower, then bounced up \$2 (is it done dropping?) it's all over the place, I can't sell now! I just need to get through this rough period and get some smooth sailing, after all I've got 3 months left! (The word on the street is that the Fed will lower rates by 25 basis points).

**Fri 1:37p.m.** - AMAT is relatively quiet now - there's been some rumors about an oversupply of chips and analysts and forecasters are weighing in. Some say with the Asian problems getting worse, they're predicting an overall slowdown that over-supply is going to hurt the semi-conductor sector in the coming

*(turn over the page now to continue)*

months. I've got 2 1/2 months left on my options and they're now valued at \$3.75, that's still a long time left, where at least I can get somewhat back to even.

**Sun 4:15 p.m.** - A thought suddenly hit me today as I was leaving the gym. I bought in at \$ 9.40, I'd had tough sledding up until now – I still have a lot of time left. So I reasoned if I bought in now at \$ 3.75, that would adjust my basis to around \$ 6!

Then all I'd need to salvage the deal was for AMAT “to come back” just a little and if I didn't break even, I'd only lose a little.

(After all, didn't I buy 4 months of time in the 1st place for a reason? Sometimes you need the extra time just in case!)

**Mon 9:30 a.m.** - I pulled the trigger and bought 10 more AMAT options, the same ones I bought for \$9.40 for \$ 3.60 this time. I figured if it got near \$ 5-6, I'd sell and get out of this mess! These options are \$10 out of the money.

**Thur 11:15 a.m.** - I had a knot in my stomach all day today and played a shitty golf game to boot. I watched in horror as AMAT continued down! Now the damn thing settles then rises again.

(Here is the most fundamentally sound company of any of the techs, in a bull market, doing past stock splits and just went through another one and it's trading at \$30 below (pre-split) where I bought in! Shit!

My brokerage account statement just came in the mail and I tore it in two pieces without even opening it. I still have a month left, my options are at \$ 1.75).

**Wed. 7:45 p.m.** - My wife and I had a big fight tonight over something stupid (in the back of my mind I wondered how much she'd fly off the handle if I told her the stock trading guru of the family had lost close to \$12,000!).

I mean I figure even if I lose the whole thing it's not like we're doomed or anything. It stings, but the whole reason it turned out to be \$12,000 is cause when I bought more options I expected a little upside move! (Now the options are around \$ 1.25. I could just sell now and salvage \$2,500 (on 20 contracts) On the other hand, selling now seals my doom. I've already mentally written off \$ 10,000 in losses, what's another \$2,500? Especially with some potential that it can go up?)

**Tues - 9:00 a.m.** - 2 weeks left. I'm \$14 out of the money. Just when I thought this thing would mount a rally, it cooled off. At this point I've been whip-sawed, gone on the roller coaster ride from hell, kept smiling, had been a good boy all along, optimistic as ever and now increasingly angry at myself for not getting out way earlier... I face grim prospects.

My options are at \$.40 cents – a measly \$650 bucks if I sell today.

“I sold today figuring it was better than zero...”

**THE MORNING AFTER** – I had a knot in my stomach all day long. Secretly I was feeling like if I could just master this trading game, get a few nice scores, I could strip off this tie, kiss this office good bye and start doing things I really wanted to do. I thought to myself it's obvious I'm not quitting my job anytime soon... and damn, that TRADE... I continue to rationalize my butt off.

I see me in the future calling big shots, a big player. Next time it's going to be different I tell myself. “The chip sector caught a slump right as I got in,” my mind tells me “so stay positive” my thoughts continue.

I strangely feel exhausted – not physically – but mentally thrashed and very tired (*which is as tiring as any workout I've ever done*)! As I think back, all I did for 4 months was do 3 trades that took no longer than a combined 10 minutes (*initial buy, 2nd buy, selling all*), and man did I feel like a warrior returned from

(go to next page now to finish this story)

battle! I wonder how Jeff fared (I didn't dare ask him, I felt too embarrassed to have anyone know I actually stayed in all 4 months!) he probably got out just at the right time.

Oh well, just chalk this one up to experience...

**But As Soon As I Get My Hands On  
Another 10 Grand – LOOK OUT!**

**TWO WEEKS LATER** – “Nuts, AMAT has mounted a nice little rally, going up around \$9 bucks from where I sold out. It's as if it knew exactly when I got in and when I got out! If I just would of held on another 2 weeks...!!!”

**THE END**

Interesting story – right? And it probably strikes a chord with you? Does it hit just a little too close to home? Listen – I'll promise you one thing...

**If This Is You And You're Willing to Admit It, There's  
Sweet, Speedy Relief Just Around the Corner and You'll  
Never Have to Go Through Such Agony Again!**

That's my promise to you!

Because by the time I'm done with you (if you're willing and open) you'll be thinking a whole lot different than your “average Joe” stock-market-dude.

My strategies work – and my track record of successful students speaks for itself. Take a look at what my new-found friends and students from around the world have to say about “The Buried Treasure Trading System”:

**IMPORTANT NOTE:** Due to the confidential nature of personal finances, many of these testimonials have only initials or just first names. But these comments are all real and they ARE on file in my office. I would respect your privacy in the same way once you send me your feedback.

“Pirate, You've got a great trading edge! And you teach it well! Hat's off to you with a 40 canon shot salute and swords raised!”

“It took me awhile to learn your system while having to rid myself of some ‘useless knowledge’ learned in the past. I think it all wasn't really going to sink in until I cleared my mind of flotsam.”

“I would read your study material/listen to the tapes carefully as I received it and now it seems to be really paying off. I only traded a couple of times until about the middle of May. Then I began more trading and up thru today I have been doing very well. **Put me down as a happy client and one who has studied your edge and traded it successfully..**”

**Steve Lehman, City, State**

“Pirate: Just wanted to drop you a note to let you know my satisfaction with the service. The updates are really prompt and **the honesty is superb**. I really enjoy the straight-forward layout ... I like the fact that Preston doesn't ‘rub it in’ concerning a profitable trade should you enter or exit at your own point. I am just treading lightly with some of the plays however I wanted to let you know that I am quite pleased with everything!”

**Doug....**

“Preston: I placed a trade just 8 days ago for 15 contracts of OVTI June calls at 2.6. I got out today at 5.6. Thanks for the good service!”

**Rick H. In Baltimore**

*(turn over the page now to continue)*

“Pirate, I picked up 8 contracts (June 12.50) on this one for 0.25 on May 6, 2003 when the stock was \$9.98. I closed out today as shown below at \$1.85. A very nice profit!!!”

**Jim B., Pensacola, Florida**

“Just wanted to say I love your site! You're very entertaining and I've made money with you too. Thank you very much. Bought MCDT at .95 and sold at 2.5. Looking forward to many updates. I'm in AMHC June 25 at 1.15 looking towards earnings. Again, thanks for your timely information.”

**Ed R**

“**When I listen to you, I make money. When I think for myself, I lose money.** Thank you, God for the Pirate. Please watch over him and don't let him get run over by a truck!”

**Reeves B, MS**

“Preston, I love this stuff! I started trading options with Wade Cook a few years ago, wiped-out an account, and have been afraid to get back into the game until I got your e-mail 3 months ago. Thanks very much for pushing me to get started again, for very good information, and for daily ideas to stimulate my trading. **I'm up about \$16,000 on a \$27,000 starting balance over the last 3 months.** My goal is to retire from my current job and be a full time trader before my 50th birthday next July. If I reach it, it will be largely due to you.”

**Tom L**

“To say I'm happy, is the understatement of the year, I'm delirious!!! As a matter of fact I best can describe my feelings by saying I've never had so much fun with my clothes on. I'm having a ball and just wanted you to know it. Warmest regards, your devotee...”

**Bob B**

“Pirate, I hate to rub it in (actually I don't) but I kept my IGT 90 calls and added the 95's when you suggested that might be a play. **The results to date invested \$7300, current value \$21,900. Not bad on top of UNH & SLM. Keep 'em coming!!!**”

**allpars7@\_\_\_\_.com**

“Pirate, All winning trades with your system. **Not so much as one loser since January [6 months].**”

**Bill D.**

“Hi Preston, **I am currently making my living using your instructions** to a T. Every trade I've made has been profitable and I no longer have to bust my ass in the woods cutting trees down for a logging company, you cannot imagine the hope you have given me for a better life, I WILL thank you in person sometime soon. Until then I thank you immensely.”

**Ron Bumpus, logcutter@\_\_\_\_.com**

“Preston, thanks for the reply, and the advice about stops. I've enjoyed the daily updates, and the fact I have someone to ask questions to. By the way, when I started the subscription to the daily e-mail, you said I would receive a gift worth \$500. **I'm up \$3,600 on the MEDI options** – that's not the gift is it?

**Tom**

“Really look forward to your correspondence, and really LIKE how human you are! Am seriously considering the boot camp. Your site is fantastic! Sheds light where there was none. Yes, I sit here with my laptop a good part of the day, but I love the stock market. Especially now.”

**Andrea**

“**My IRA account was down to \$12,233.55 - then I found you - after two weeks my account is up over \$30,000+.** Thanks very much.”

**Ed Z, WA**

“I really like your BURIED TREASURE service, I’ve only been a subscriber for about three weeks, but just in that shortest amount of time I’m already enjoying very nice profits.”

**J.B., NM**

“Pirate, Like the beer commercial... ‘Love ya man!!!’ Great news to report: **I’m up \$19,501 on trades and I also have \$46,400 in profits** I’m waiting to take off the table. Thanks for all of the information! Lazy and Unlucky ain’t all bad! Keep up the great work and thanks again.”

**Mike, Chicago, IL**

“I have been trading futures, stocks and options for nearly 5 years and have taken a dozen or so different trading courses, but from what I see so far, **yours is the best**. I have recommended your service to several friends and relatives.”

**Carl T, MN**

“You know before I heard of you, I was searching for a book on how to benefit from earnings reports (runs) and there isn’t a book out there on the subject. Two days later a friend of mine introduced me to your site and ‘walla’ here I am. I dig your writing style and your humor. The way you write reminds me of my family, friends and myself. Keep up the great work.”

**J.S.**

“Just wanted to drop you a line to tell you how much I enjoy those tape of the months. It is great to get the inside track and know what I’m doing and experiencing is happening to others. I look forward to meeting you.”

**C.E., CA**

“Pirate, what you do is so easy, so ‘logical’, so profitable, so predictable, so consistent.. I almost can’t believe it!!!”

**D.H.**

“When I signed up for the Gold Package, I wanted to see your track record. I’ve seen hundreds of claims and gotten sucked into a few. Still I don’t have a spreadsheet from you, so I constructed one of my own since the middle of July 1999. Of the plays, your stocks have moved an average of 8 points. WOW! Thanks. It took me a long time to dump the B.S. in the brain, daytrading, charting, no sell date, etc.”

**J.M.**

“Thanks for sharing your insights on trading. I have learned more in the last month from your tape set than anything I’ve learned in the last 5 years that I’ve been actively trading. I like your cut-to-the-chase perspective on what makes the market move and how to take advantage of it. Have a great day!”

**R.B., LA**

“I am very grateful to you because **you are instrumental in me becoming half a millionaire in 3 months starting with \$30,000**, ever since I went to your Bootcamp. Thanks also for your enthusiastic and encouraging daily comments.”

**V.B., TX**

“**I have more than tripled my money since starting with you only two months ago**. I think there is no better way to trade than this, it is ALMOST TOO EASY, kind of like shooting fish in a barrel. Keep up the great work. I am really enjoying this. I like the idea of feathering my nest now, getting out of debt and putting away the cash for the future.”

**R.S., CA**

“I just wanted to drop you a note of thanks. **Since I started with you, I now have a profit of**

*(turn over the page to read more results from my customers)*

**\$395,437 in my brokerage account.** Thank you so much for what you do!!!”

**Jack S., Missouri**

“I wanted to first tell you how happy I am with all of the research and great trades you provide for us. **I have made money on every trade you told us** and I want to give you a big THANK YOU!”

**D.N., TX**

“I have been trading options for clients for over 14 years and I have never met anyone that makes options trading as easy as you. Keep up the great work.”

**M.T., CO**

“I just wanted to drop you a line. **After taking and running with your teachings I have been able to pay for my daughter’s college education.** She is going to an expensive private university. Thanks for all of your help.”

**C.S., MN**

“Hi Pirate, I wanted to start off by saying thank you very much for all you’ve done for us. **We reached our initial goal of \$1,000,000 as of January 1, 2000. Thanks for everything.**”

**Art S, AZ**

“You are simply outstanding! The hard part is riding through the market dips and resisting panic selling, just like you said. I’ve learned things almost always come back to the plus side. My most appreciative and sincere thanks.”

**-B.N.**

“We had to write you and let you know how great your system is. What a difference this is making in our lives. We really appreciate the Pirate and hope for continued success!”

**Jerry and Linda L, OH**

I could go on and on for pages with all the glowing results people like you are getting from trading the way I trade. Please remember – these are *all REAL*.

Everyday, my email “in” box is jammed with testimonials like these. I’ve got dozens and dozens of letters from customers around the world... but they’ve all got one thing in common – they’re all people like you.

They’re people who are tired of all the lies, the misleading advice, and the financial “terrorists” (analysts) on TV. What I say just “rings true” to them. You see... I just don’t buy-in to all these catchy little slogans that float around disguised as “good advice”. For example:

**“Just go for base hits and you’ll make money”**

Who in the world came up with that piece of pathetic trading advice?

Based on my experience – that advice just does not translate well in the stock market! I don’t care who came up with that... but I think it’s the most sucky stock market advice ever!

**If You Don’t Go For Homeruns with All Your Trading,  
Then You Don’t Have Any Business Trading!**

(If you don’t get anything else from me – get that!)

If you’re out there trying to hit singles and “just get a little bit”, thinking, “Now I don’t want to get greedy”... I’m here to tell you – that’s a bunch of BS!... and you’re going to lose!

You know why? Because human emotion makes you hang on to losers! **And it also makes you hurry**

(go to next page now to continue...)

**up and take a small profit so you can “be right”**... and by always taking small profits you’re going to go into the red... because the gargantuan losers are just going to wipe you (and your account) completely off the map!

And that’s the reality. It’s the way humans are hard-wired... it’s just our reality.

Listen, you need to take all your stock market books with all their “fluffy, feel-good advice” and box ‘em up and sell ‘em on eBay my friend!... cause their advice has nothing to do with reality.

**And what I want to do right now is give you some information (not advice) that DOES have something to do with reality. In involves giving you what I’ve come to call a “mental enema” – I want you to wipe your brain clean of all this trash that’s passed off as “good stock market advice”!**

Heck, for all I know, it used to be good advice back in the “buy and hold” era. But guess what? This is a different stock market! Remember?... this isn’t the “buy and hold” era any more! This market is unlike anything we’ve ever had in the entire history of the stock market! And all the “old, sage advice” just isn’t what you really need to hear in order to make consistent money in this stock market!

And if you think I’m insane – if you think I’m not making any sense at all – just look at it this way:

**If All This Advice Is So Great That Everyone Else and Their Dog Is Following It, Don’t You Really Want To Be Doing Just The *Exact Opposite* Of Everyone Else and Their Dog?**

*ABSOLUTELY!*... *sign me up to do the opposite, man!*... I do not want to be following the masses! Cause guess what?... **the masses always get absolutely slaughtered on Wall Street – period!**

Now, I may have just offended you – but that’s okay... because if you were making the kind of money I make in the stock market you wouldn’t be reading this right now.

Can I be frank with you?

There’s a reason you’re reading this right now.

And the reason is probably because your 401K has been blown away... and now it’s a “101K” plan... if you get my drift. Or you’re reading this because you’ve been through too many seminars that tell you how you can use charts, lines, graphs, and analysis to “get in” at just the right spot and make a fortune.

But unfortunately, you were never quite able to make the plays the same way the “guru” did them. Right?

The reason you’re reading this right now is because **you’re not satisfied with your current financial situation!** And I’m here to tell you that...

**A Big Reason Your Current Financial Situation is Unsatisfactory to You is Because of All the BS Brainwashing Advice All the Wall Street “Experts” Spew in Their Books, on Their TV Shows and Interviews, and in Their Newsletters!**

And I’m telling you, you’re going to need a mental enema to get rid of dozens and dozens of “free-floating BS particles” in your head... **beliefs that you’re hanging on to because some expert in some book said it’s “the first rule of trading” or whatever.**

*SO FLUSH IT OUT!*

And you’d better flush it now. Why?

*(turn over the page now to continue...)*

Because unless you **FLUSH** enough of that “crap” out of your head, **you’re not going to have room for this brilliant, money-sucking strategy that works like gangbusters!**

In other words... you will refuse to be “open minded” because your mind will be too full with all the garbage you’ve been taught.

Once you finish reading this, you’ll be thinking differently about making money in the stock market... I guarantee it. So let’s get to it... it simply boils down to this:

Before you ever buy a stock, you have to have a very definite **compelling reason** – and a high degree of certainty – **based on reality** that this stock will *MOVE* in the right direction, after you get in it! And when you discover this, trading and investing will actually become...

### **Fun Again!**

Remember that word? I hope so! **Because there’s absolutely nothing more FUN than being RIGHT and MAKING MONEY on a trade!**

And when you can use the amazing leverage power of options, which simply give you an unlimited upside with a limited, fixed downside – you can turn a 20% stock move into a bundle of cash! Like a 150% return instead of 20%!

I’ll show you how! But I’m getting way ahead of myself – because this isn’t even about options and their leverage power . . . it’s about

## **Being Able To Predict When A Stock Will Move In The Future Due To Overwhelming And Predictable EMOTIONAL Reasons!**

You say bunk?

You say there are no stocks going up because the media says the economy sucks?

Well, you haven’t looked closely enough! Remember this key rule:

**Whenever money leaves a stock like Enron or Worldcom, it seeks a better return, it seeks a surer thing.**

And sure... some money does go to the sidelines – but most of it switches back and forth between different stocks and sectors... (again) *seeking a better return.*

And over and over again money seems to magically get attracted to a stock only during certain times... certain compelling times when lots of buying emotion takes over due to this one thing...

### **GOOD NEWS!**

Or better said...

### **The Anticipation of GOOD NEWS!**

And that... right there... is the answer to where all the profits are hiding!

It’s the “buried treasure!”

If you take anything away from this short message, it should be this... **you should focus on the immediate future of a stock, NOT on past patterns.**

I mean – it’s so common sense that it’s almost laughable!.. but 99% of what’s taught, lectured about and studied is about a stock’s PAST, not it’s immediate future or why it should go up AFTER YOU BUY IT! So you want this explained some more do you? Well okay, but you might want to take the phone off the hook

*(go to next page now to continue...)*

hook and become “unavailable” for just a couple minutes. After all –

**This free information can literally change your financial life and give you a huge mental relief...** which is... the “insurance” that no matter what happens – you’ll always be able to make money from a side source without hardly doing any work. No matter how bad the Dow is or how weird the world gets – you’ll have a way to make nice money.

By the way, my name is Preston James and several years ago the nickname “Pirate” seemed to stick due to my – some would say – uncanny way of finding very profitable trades that seem to be “buried” or “hidden” from the crowd.

All my trades are built around this single concept...

### **Future, Compelling News Events**

So now, instead of the traditional way of trading blindly off some analyst’s upgrade,

...or rifling through hundreds of charts to find a “good deal” ...

...or buying a stock simply based on the fact that it’s “undervalued” ...

...instead you simply unleash the power of “emotions”.

To do that, you simply get your eye on a “compelling future event” where you know **a gathering of emotions, rumors and buying will occur beforehand** – buy in when it’s quiet, and then you sell out at the most frenzied point in time! It’s that simple.

So now that I’ve explained things a bit – I’m now ready to reveal to you this *AMAZING SECRET!* Are you ready? Here goes!

First, before I tell you what it is, it’s important to understand that I’m not giving you advice on what to buy, nor am I a registered investment advisor. I’m simply revealing what this certain piece of news is... and how --as if by magic-- it makes a stock move higher, 86% of the time, 3-6 months down the road!

With that said, here it is . . .

**It’s the “Pre-Announcement” of better than expected earnings!** Not the actual earnings announcement, but a “pre-announcement” of better than expected earnings...

Let me explain...

Publicly traded companies ARE REQUIRED to formerly announce their earnings results, which in most cases, happens every quarter (every 3 months).

And the reason a company’s earnings are the most widely followed, anticipated and commented-on news item is because **they determine what investors are willing to pay for a certain stock.**

Are their earnings improving over last year? Over their competition? Or did they disappoint the crowd versus what was expected? It’s the bottom-line, “where-the-rubber-meets-the-road” figure... stocks live and die with earnings!

But here’s a bona-fide fact:

### **Earnings Are As Unpredictable As A Tropical Storm!**

Right?

And unless you have access to illegal “inside information”, it’s impossible to know what a company will report in a given quarter! One company may “surprise the street” and beat earnings handily – which will

*(turn over the page now to keep reading)*

make the stock go up of course,

-OR-

It could miss them terribly and cause their stock to “gap down” not even allowing you a chance to sell your shares (until it resumes trading \$10 below where it was of course!)

### **But Here’s What Hardly Anyone Pays Attention to!...**

Now what most people don’t know, or don’t pay attention to is when a company “pre-announces” news about their upcoming earnings! (*This can happen 1 week, 2 weeks, 1 month, sometimes 3 months BEFORE the actual earnings date*).

This can be bad news, or it can be good news. And even though you can make money either way, I’ve singled out the positive “pre-announcements” because they are the most predictable!

Why do companies “pre-announce” before their actual earnings announcement date? There’s lots of reasons... but the only important thing to realize is **this happens to hundreds and hundreds of companies every single year... literally almost every single trading day!**

And these positive pre-announcements are so powerful that over the next 3-6 months, 86% of these stocks are trading at a higher price than before!

Why does it make the stock go up? Because this SUDDEN and UNEXPECTED good news comes from the COMPANY ITSELF!

It instantly turns into a “sure thing” – the question marks are removed – money and capital start hitting the stock and rewarding its performance – it’s really a site to see!

And you *could* just sit back, kick your boots up and buy stock in a company that pre-announces better than expected earnings and do very, very well – but that’s just the tip of the iceberg!

I’ll explain this in a second, but it’s important that you realize why these “pre-announcements” are such a sure thing – now stop and really “get” this:

**A company’s CEO is not going to publicly state they plan to beat the current earnings projections and then *NOT* have this come true!**

Think about it! In the financial world right now, where corporate fraud and mistrust is everywhere and CEO’s are being watched more closely than ever – it’s just not going to happen!

### **Not On Their Lives!**

It’s also very, very important to remember these “pre-announcements” are not being conjured up by some financial terrorist, er, analyst. They are very different from an “upgrade” or some other jibberish that this cartel has invented.

Now I’ve classified these pre-announcements into 4 categories which I don’t have time to get into here... but there are some downright exciting pre-announcements and they come out *ALMOST EVERY SINGLE TRADING DAY!*

And here’s what I do...

**I pick the ones that have the biggest “gap” (or the biggest surprise) between what was previously expected compared to what they say in their new pre-announcement release... and I immediately then look up their FUTURE earnings date.**

Now with this future date I actually have an exit date for my potential trade! Imagine that...

*(turn over the page now)*

## **Knowing When You Will Get Out Before You Ever Place A Trade!**

(Are you following this!?)

With that marked down, I'll then wait for the initial excitement of the pre-announcement to die down, sometimes a few days – sometimes a few weeks. But then I'll then try to buy into this stock when it has pulled back a little... when it's "quiet"... when the market's off worrying about their next worry! (*Emotions are EVERYTHING in this!*)

Because guess what invariably happens as the actual earnings date approaches? If you guessed the stock price starts to jump up due to intense anticipation, rumors and excitement – you'd be RIGHT!

And like I said a minute ago – when you use the awesome leverage power of options – the stock doesn't have to move that much *BUT YOUR OPTION CAN MOVE HUGE!* **Plus, you already know when you're going to sell!**

Imagine that!

And here's the best part:

You won't spend a measly minute plowing through chart after chart after chart! Not a wasted second with Bollinger Bands, RSI, Stochastics, MACD, regression lines, moving averages, histograms, expensive real-time quote feeds, candlesticks, balance sheets, debt ratios, support and resistance levels, pennants, double bottoms, or triple tops!

**You'll just let the power of excitement and intense curiosity take over!**

Which will allow you to...

**Have A Life!**

And as long as people (and human nature) are behind the stock market, **there will always be emotional events to trade on – always!**

And like I said, this is just ONE of the many pieces of news I use... and what I've explained is just ONE of the many ways I take advantage of these easy trades.

**Now please understand:** "The Buried Treasure Trading System" is not like anything you've ever seen before. This is not information you'll find in all the other stock trading books that are out there in the main stream. And you definitely won't find this information in the curriculum of the top universities of the world!

You'll be learning my deepest secrets about how I make money in the stock market.

"The Buried Treasure Trading System" gives you every little detail about how I trade "future compelling news" trades. You get everything you need to jettison your trading profits through the roof.

Take a peek at what's inside this treasure trove of information:

- **Exactly where you can find all the future compelling news you'll ever need to get filthy rich using what I teach you!**
- The misunderstood secret of betting big and winning big... how to get in the feel of it, get on a roll while the market is ripe, and soak up the big money!
- The difference between a "trader" and an "investor" (*and why you won't get much from me on how the traditional, boring, let's "buy and hope" stuff!*)
- **How to lose on more trades than you win on, and still come out smelling like a rose!**

(turn over to next page now to continue)

- Why stockbrokers like to say, “options are too risky” before you can even get an word in edge-wise, and the dark truth they like to hide about where the real risk lies!
- **Why “buy and hold” sucks, fundamental analysis sucks, day trading sucks, technical analysis sucks, and going on “gut feeling” sucks!** (*...And what I do instead of all this crap!*)
- **My “Delusional Basket-Case” theory and how you can learn to leverage it into massive windfall profits every time you find a “future compelling news” trade!**
- Why “buy and hold” has gone the way of the dinosaur and why you should shoot the next stockbroker who tries to sell you on “the next Wal-Mart”!
- **The sexy, addicting, and sophisticated attraction of day trading and 6 reasons why you should flat-out *RUN AND HIDE* from this type of stock trading approach!** *Hey!... if you want to trade against the very best “big-boy” traders, try to out-wit them, out-strength them, and out-move them – be my guest... day trade your life away. But the results aren’t going to be pretty! You may even be able to lodge a few scores – but over time... you’re toast and you’ll lose every red cent you have!*)
- **The real reason why people are still attracted to technical analysis!**
- The facts about how your own emotions can wipe you out and get the best of you and instead, how to follow a brain-dead system where you literally step outside of the trade and get out of the way!
- **Believe it or not!... there are some weeks that I’m not even in the market – I don’t trade!** 9 to 10 trades a month is just about right for me!
- **The one magic ingredient that has existed since human beings have been on the planet – and how you can take full advantage of it day after day, month after month, and year after year!**
- The little-known secret behind picking battles you can win – and trust me, it has nothing to do with out-duping the “inside” players!
- **How to trade when people are going to become insane to buy something, then... you sell out right before the pinnacle is reached!** (This isn’t pie-in-the-sky... my students do it all the time, day in, day out – and you can too!)
- The money-making truth behind those old, familiar words: “The more things change, the more they stay the same!”
- **My cardinal, number one rule when it comes to getting out of a trade... and why it needs to be firmly rooted before you even bother getting in.** Otherwise your brain will turn to MUSH and you’ll end-up riding it up, and then watching it drop back down while you drench yourself in worthless “hope”... “I hope it goes back up”... “it should go back up”... until finally you take the loss and bask in the pain of more money down the drain.
- **The sweet, magical allure of rumors – and why the cold hard facts just don’t measure-up to the mystery and fantasy of a rumor!** (AND... how to use this information to profit from human nature over and over again!)
- **Why every trade I take is taken when the stock is “quiet”... when people don’t really know what’s going on.** (And then, you’ll learn how I’m the guy who’s happily selling to the other basket-case-type people who are just barely buying once the stock has already heated-up and gotten real frenzied!!!)
- The truth about greed... and why it’s good! (*In fact, it’s the American way!*)

(go to page 17 now to continue)

- **The recipe for disaster is to be happy with little profits!... and why I say “get greedy!”** (If this goes against everything you’ve learned – you’re right! And maybe that is EXACTLY the reason why it works!.. because the masses are brainwashed into believing that “pigs get slaughtered”!)
- The most important trading question to be answered is “When do I sell?”... right? **Well, how would you like to know when to sell... when to get out? My stuff will always give you an exact time to sell!**
- **Proven strategies that will “get the selling out of the way”...** one strategy actually lets you make money if the stock stays the same or goes up – and the best part about it is you get the sell decision out of the way first!
- **Why you’ve got to forget about the day-to-day, real companies behind the stocks and learn to focus on how human beings go crazy when money is in the mix, and how to literally take the money from them while they’re going bonkers!**
- A little-known SEC filing that gives me the green flag to buy a stock on a specific date, and which also tells me exactly when to get out! (*You will be one a privileged few to get your hands on this information... you will never trade the same again!*)
- **Why you must GET OUT OF THE WAY and use a system of buys and sells while you sit idly by! I’ll give you that system... lock, stock, and barrel!**
- SHATTERED TRUTH: Why the common Wall Street rule “buy on rumor and sell the news” is nothing but a crock of absolute SHIT – and what I do instead!
- **How to know exactly when to buy, exactly when to sell, and exactly when to bail out!** (You’ll find there’s no guesswork with what you learn from me – it’s all straight ahead, and perfectly clear!)
- **The unexplained reasons why a company will actually plunge on positive earnings announcements – and exactly how you can profit no matter what the announcement is!**
- My “quickest way to make money without a gun” trading strategy which has produced some of the quickest, yet most profitable trades I’ve ever taken! (Over the years, this thing has worked over and over and over again – you will love it!.. it’s a “bread-n-butter” trade!)
- **The deadly realities of stock splits, and how you can lose your shirt on them unless you follow my “five key stock-split trading rules” to the “T”!**

**What I Teach You Is So Simple... So Doable...  
That Sometimes I Think Maybe I Should Try To Make This  
Whole Thing More Complicated and More Mysterious  
So It’ll Seem More Believable!**

**What You Learn From Me Really Is That Simple!**

- The honest to goodness truth about how you can lose on 8 out of 10 of my trades and still double or even quadruple your capital on the 2 winners! (There’s no BS here – I’m just telling you like it is.)
- **Which makes more sense?...**
  - a. Buy and hold a stock and hang onto it through thick and thin, go up and down with it, maybe even go through some times where you get scared – and after this roller coaster ride, you’d be up from \$30 to about \$60 nine years later – OR...

*(go to next page now to keep reading...)*

- b. You get in on right before the exact month where the same stock runs up \$30 dollars and then get out right at the top!

That's exactly what Circuit City did... and it's also exactly what I did – I snagged that \$30 run-up in one month... and **I'll show you how to do it down to the last nitty-gritty detail!** (see pages through 64 in my manual!)

- The only thing you ever need to know about technical analysis while trading my strategies!

## **The “Buried Treasure Trading System” Is Like Nothing You’ve Ever Seen Before On How to Consistently Suck Loads Money From the Stock Market!**

My approach to cramming my bank account to the brim with money I've taken from the stock market is completely different than anything you've ever seen, read, or heard before – and I'm absolutely convince that any semi-intelligent person can do what I do, once they understand it!

“The Buried Treasure Trading System” is your complete “encyclopedia tour guide” to making money in the stock market. It's all laid out for you in precise, step-by-step detail.

Here's what you get with your own “Buried Treasure Trading System”:

- **“The Buried Treasure Trading System” 3-ring binder manual** – crammed with power-packed details on the different strategies I use, pictures, and demonstrations of different plays, charts, and play sheets to track trades (real or paper). This is where I reveal my proven trading strategies in precise detail.
- **CD-Rom Tutorial** where I walk you through where I find a trade, how I research it, and how I decide if I'll trade it!
- **Four Audio CDs** where I go in depth into all my favorite strategies!
- **Special Checklist: “The Only Things You Need to Know About Technical Analysis”** which boils down and explains the tiny amount of technical analysis that I DO use.

And if you order within 10-days of the red date on the enclosed order form you'll also get these killer bonuses worth three times your investment in “The Buried Treasure Trading System”!...

### **FREE BONUS #1: “LIFETIME ACCESS TO PIRATEPICKS.COM!” (\$1,000 VALUE PER YEAR!)**

There's absolutely nothing like this on the planet...

**Instead of sending you out into the cold, cruel world with absolutely no guidance whatsoever, to try and find (out of 10,000 stocks) these killer pre-announcement deals on your own – I go out and find them for you,** and list only the ones with the BEST potential on this password protected website.

Now, these aren't the actual trades I'm making... but of the trades that I DO make, they're picked directly from this very list. You get it all in one place – and it's updated daily.

Now please understand – you can get this information on your own. You don't “need” me... you can get this information on your own; it's available on the Internet if you're willing to dig and dig and dig and dig!

But get this:

I've paid a software genius dude to create an elaborate software program that **actually searches all the news wires in detail for when a company announces**

(turn over now to continue...)

**any kind of positive pre-announcement news.**

And every morning the market is open, I'll give you the updated list of all the plays that fit my criteria! And most importantly...

**Your Password to this Website Will NEVER Expire! You Get Lifetime Access!**

This free bonus gift will save you hours and hours of time spent tracking down all these killer pre-announcement stocks and put them all right in your lap. From there you can pick and choose the plays that match your risk-to-reward tolerance!

**FREE BONUS #2: "STOCK CPR • HOW TO (WITH NO RISK WHATSOEVER & NO COST) GET BACK TO EVEN ON A FALLEN STOCK – EVEN IF THAT STOCK NEVER, EVER RECOVERS TO IT'S ORIGINAL PRICE! (\$149 VALUE!)**

This amazing free report tells you exactly what the title promises! And man oh man are you going to love this – especially if you took part in the Internet-Stock bloodbath!

Holy cow... CPR stands for "Current Portfolio Repair" and believe it or not, **this strategy actually costs you nothing**. This is your chance to "repair" a stock that's lost 20, 30, or even 50% in it's value!

I learned what's revealed in this report from Jon "Dr. J" Najarian, a good friend and 23-year veteran of the Chicago Board of Options Exchange (CBOE). It'll absolutely blow you away! It's designed for the stocks in your portfolio that really took a hit, and need some TLC.

**FREE BONUS #3: "TIMELESS TRADING TIPS" AUDIO CD WITH TOBIN SMITH (\$99 VALUE!)**

Tobin Smith is the best-selling author of "Change Wave Investing" and the founder of ChangeWave.com... and this is an "insider's only" look at what Tobin does. This one-hour interview is absolutely killer... for over an hour I pick his brain bone-dry about all his favorite set-ups, trading tips and trading strategies.

Tobin's specialty is finding large "waves of change" before Wall Street even knows they're coming – and then he uses unique trading strategies to take advantage of the wave! You'll be in awe as you hear about HOW Tobin identifies these waves, and how he trades them!

**FREE BONUS #4: "TELE-SEMINAR WITH THE WORLD'S GREATEST TRADER" AUDIO CD WITH DAN ZANGER (\$99 VALUE!)**

Not too long ago, Dan Zanger was featured in Fortune Magazine and on a full half-hour episode of the "Extra" TV show. Why?

His story is just too amazing! A former swimming pool contractor in California, **Dan started with \$11,000 and in just 23-months turned it into 38-Million dollars!!!** (This is all certified by independent auditors and accountants).

Now get this: Half of the 23 months were spent in a bull market – and half of it was spent in a bear market!

So this guy really knows his stuff – and this interview I did with him is just amazing. I asked him everything about how he did what he did!... what he likes to look for, patterns he likes, which trade set-ups are his favorites – and on and on... **we talked for a whole hour about how he did this incredible**

*(...turn over now to continue...)*

**feat!** This guy's brilliant – and his track record proves it... hey, he's got **the world's greatest trading record for that period of time.** You will really love this interview!

**FREE BONUS #5: “TRADING FOR A LIVING” AUDIO CD WITH DR. ALEXANDER ELDER (\$99 VALUE!)**

Dr. Alexander Elder is the best-selling trading author on the planet... his books are a “must read” for anyone who trades. His book is called, “Trading for a Living” and is always on the top of any “Top Trading Books” list.

In this interview, I grilled Dr. Elder... and let me tell you, **his advice on money management alone is worth the cost of this entire course** – I kid you not... but it's yours FREE when you order within 10-days of the red-stamped date on the order form!

**FREE BONUS #6: “PIRATE PRE-ANNOUNCEMENT TELE-SEMINAR” AUDIO CD (\$99 VALUE!)**

This is a one-hour, private conference call I recorded with my top trading members... and I went into excruciating detail explaining from soup to nuts exactly what I look for and how I play these “pre-announcements”... including... how I find them, when I get in them, why I decide to trade some of them... why I won't trade some of the others... when I get out of them... and on and on!

I also spend quite a bit of time answering specific questions that people have... that's important because these are likely to be the SAME questions that you'll want answered.

You'll want to listen to this CD over and over again to really hammer-home exactly how I make money with these pre-announcement trades.

**FREE BONUS #7: “60-MINUTES OF MY TIME... ONE-ON-ONE WITH YOU!” (\$500 VALUE!)**

Once you go through the course and dig through the website you may find that something's just not quite “clickin'” for you... THAT'S when you'll want to pick up the phone and call my office.

Now, please don't expect some high-rise, voice-mail juggling, high-brow business. I care about my customers... and my staff and I are here for you. So... what you'll get are three certificates... each one good for 20-minutes of one-on-one coaching and Q&A with me or a highly trained member of my staff.

So if you have any questions, or if you just want some reassurance about a particular strategy that I use, you will get some hand-holding.

Now you can't just call out of the blue and expect to get “instant help”... but if you'll leave your name and number we will get back to you within one business day.

Now... let me shift gears here – because I know I've got some explaining to do – because I'm sure you may be wondering why any sane person would be willing to take his very best trading strategies and sell them to the public.

Well – quite honestly it's because **I got tired of teaching this system via one-on-one personal coaching, writing a daily subscription, and traveling to multi-day seminars.**

Even though people have gladly paid me \$8000 for 8 months of personal coaching, \$129 per month for my daily market comments, and \$2780 for two-day seminars – I got tired of running ragged, spending 14-hour days teaching this system and being at the beck and call for what seemed like an endless list of clients.

And one day I just up and quit everything! I'd had it! Why?

*(go to next page now...)*

Because I couldn't take it any more. I even had to give a lot of people their money back... but I just had to do it.

That's when I got the idea of boxing all my ideas up and putting every single thing I've learned and perfected during the last three-and-a-half years into a simple and easy-to-follow system.

So by listening to some audio CDs, reading an easy-to-follow manual, following along with some CD-roms and getting a LIFETIME password to my private website – you'll learn everything you need to know to start finding the buried treasure with these future compelling news plays.

**And because you're not buying "my time"... I can offer this package to you at a very reasonable one-time price** – revealing every little thing you need to get started, all with very little need to contact me or my staff.

Now let's stop and think about something right now. Maybe you've traded in the past, where you feel like you've had to be trading all the time.

You need to get into this... or get into that... and you're buying and hoping on this one – and an analyst says something that makes you go buy something else. You're maybe going off of news that's already been announced or factored in or played out as it hit the market.

You might find yourself biting your nails down to the nub and just kind of hoping things will work out.

**My strategy is 100% different.** You wait for a little piece of news to trigger to get in. You anticipate a massive amount of buying after certain rumors start swirling.

Now, you're already in... it's a trade where when you get in, you already have a day when to get out – meaning, you can go to work, you can hang out, you can play with your kids, you can go on vacation or whatever!

You can casually check a quote on the stock every other day or whenever you want... but it doesn't really matter because you already know exactly when you're going to get out! You don't have to drive yourself insane!

This is just one trade... you don't have to do 17 trades and go bananas doing it!

Do one trade and wait for a month and that's it! If you want to have other trades going on the side, like my "quickest way to make money without a gun" trade – then that's fine.

But you don't have to!

Are you getting this?

This is really something different – something unique... something you've never ever heard about, seen, or read about in a book or newsletter. This is an easier way.

Now because you won't be buying "my time"... I don't need to charge you the same \$8,000 others have paid. You'll get it all, my entire "Buried Treasure Stock Trading System" for an amazing, one-time price of just \$1,685.

And I'll tell you – **it's a damn-fine bargain at this price.**

Other trading systems cost much more than this per year! But not with my system... you'll never have to pay for anything else again – ever!

This is also a **thousands** less than a one-time seminar, and you'll have the same information at your fingertips and any time you need a refresher you can just click a button to hear it all again – you can't do that with a seminar!

*(turn the page now...)*

My system is based on a timeless, core truth about the stock market that will never ever change. The simple fact that people and their emotions are responsible for stock moves and if the news is compelling enough, you can find these future dates before hand, plan a trade (along with an exit date), and make money even while doing something else in the meantime!

What more could you want?

However – I realize you still might be skeptical or think that the price is too much. So I've decided to give you an even better deal.

For a limited time, I'm going to sell my system with an amazing...

**“Pay Only If You Profit, 100%  
Risk-Free Guarantee”**

Order the system now, and pay just half of what everyone else has had to pay – not the \$1685 dollars... but **just \$842.50**. Try it out for a full 90-days completely risk-free.

Trade, make money with it, and see for yourself that what I've said here is really true.

**If after 90-days you don't make back your initial investment and enough profits to cover the remaining balance of \$842.50, send back the course for an immediate refund with no hassles and no questions asked.**

However, if you're making money like crazy (like I know you will be) keep the system and send in the remaining balance on your honor.

*— Preston James*

Guarantees don't get any better than this, and I'm doing this on the honor system – so I trust that once you're making money you'll send in your second payment.

In effect, you could simply NOT pay the remaining balance – but I'm betting you won't because I know how valuable this system is.

And if you're making profitable trade after profitable trade no matter what kind of stock market it is, why wouldn't you want to reward me for showing you the way?

Anyway... that's the deal.

Now you've gotta understand that by selling my system for half off and with this risk free guarantee you can't be calling and asking me or my staff questions all the time.

**You'll learn everything you need to know to make my stock trading system work** directly from the audio CDs, the manual, the computer CD Roms, and from the exclusive “members only”, **LIFETIME** access you get to my website. (*Which, by the way, contains a list of every single “future compelling news” dates all in one place!*)

But I realize you may need a little hand-holding once you first get going. So, as a special bonus, if you order within 10-days of the red-stamped date on the order form, I'll also give you

**Three, 20-Minute Phone Consultations!**

These certificates have a value of \$500 and you can use them to speak to one of my highly trained staff

members. And you won't want to waste a minute of time when calling to use your certificate so you should have your questions organized and ready to go.

Now that I've told you how simple it is to make my system work, so **you can start to make predictable, profitable trades over and over and over again** – AND how you can get it now for the low, half-off price of just two low payments of \$842.50 (*and remember... you only make the second payment after you're making money*)... let me tell you how to get it:

For fastest service please fax your name, address, telephone number, Visa, Mastercard, Discover, or American Express information to (801) 880-0190. Please write the words, "Buried Treasure Stock System" on top of the fax.

Or, if you prefer, you can use the enclosed "No Risk Order Coupon" and mail your check or credit card information to:

**Bull By The Horns, Company  
3945 South Wasatch Blvd. #316  
Salt Lake City, UT 84124**

Please make your check payable to Bull by the Horns, Company in the amount of **\$842.50**.

Don't worry about the remaining balance. We'll send you an invoice at the end of 90-days (which you are under no obligation to pay if you're unsatisfied for any reason or for no reason at all.)

And at that 90-day mark, you can decide to keep the package or return it for a full refund of your initial payment.

As soon as we get your order **your package will be sent to you by overnight, by Federal Express**. And most people are able to start trading with it in a week or two.

However if you're not absolutely satisfied with it for any reason, you can return it after using it for 90-days or anytime before the 90-days is up, for an immediate, no-questions-asked, no hassle refund!

Either way **there's never any risk on your part**, and you're under no obligation to pay the second payment – unless you're absolutely thrilled with the system and decide to keep it.

Look, the "Buried Treasure Trading System" is the next best thing to having your own "magic pill" for profiting from the stock market.

**The "Buried Treasure Trading System" will put an end to your losing streak, and start growing your income, your retirement account, and your lifestyle.** I'm talking a real-life, nuts-and-bolts, down-to-earth, step-by-step system for pumping money out of the stock market and into your pocket!... time and time again!

And probably most important of all... **you'll finally have an edge that allows you to virtually create cash-flow at will.** That's what excites me – to give another person a priceless advantage over all the crooks, book-cookers, and financial "terrorists" out there shooting-off at the mouth and deceiving the public.

**To make a difference in your life really motivates me.**

Sure, you can go ahead and keep throwing more money at the market if you really want to – and you can hope some of it will give you a "good return".

**But why put yourself through it all?**
