

With the graphic equalizer you can boost or cut your signal  $\pm 10\text{dB}$  at 100Hz, 1,000Hz and 10,000Hz for vibrant sound.

You'll see the station you've locked on to AND the signal strength.

You can preset 10 stations (5 AM and 5 FM) into the memory. Then, with the touch of a button, you can leap from a ball game to an all-talk radio program to a stereo classical music broadcast.

It's engineered for digital. The CD-Inputs are specifically designed (and even labeled) for a CD player.

The matched decks deliver superb high-speed tape-to-tape recordings and continuous-play music.

# Audiophile Odd Couple?

**Detonate phenomenal audiophile sound with Seiko Instruments' \$149 portable component system for DAK's market-busting price of just \$69<sup>90</sup>. This portable component is flawlessly designed with sensitive PLL DIGITAL tuning and electronically-matched dual cassette decks. Plus, you can add an optional 16-bit, 3-beam component CD player and unleash their combined audio fury for a breakthrough price.**

By Drew Kaplan

It's true. Even the largest audio companies can make mistakes. Let me explain.

Seiko Instruments created one of the finest portable components I've ever listened to. The DIGITAL PLL tuner locks on to AM or FM stations with rock-solid precision. And, its electronically-matched dual cassette decks deliver stunning sound.

Seiko Instruments went all out to build the best 'ready-for-digital' portable component they could. They expected audiophiles to plug it into their CD players at home.

But, salesmen couldn't (wouldn't?) explain this portable's unique engineering and advanced design. So, the people at Seiko Instruments were stuck. It was a real shame.

## ACE UP DREW'S SLEEVE

I made Seiko Instruments a ridiculously low, cash-on-the-barrel offer for their entire inventory of these exceptionally-engineered portable components.

And now, you can thrill to rock-solid PLL digitally tuned AM and FM stereo broadcasts and the precision of matched continuous-play cassette decks, not for the \$149 retail price, but for just \$69<sup>90</sup>.

Plus, I've paired Seiko Instruments' portable component system with a 16-bit component CD Player for a breakthrough price of just \$149<sup>90</sup> for the pair.

You don't need a separate amplified stereo system. This portable component and CD Player IS a complete stereo system.

## ENGINEERING BREAKTHROUGH

Turn it on. Touch a button. The Phase Lock Loop (PLL) digital tuning system automatically seizes even the weakest broadcast signal. It makes a real difference in your FM recordings.

Plus, the 5-segment LCD tuning meter shows you when you're locked on.

And, you can program up to 5 AM and 5 FM stereo stations. So, you can leap to your favorite station with the touch of a button.

It's a tape factory, too! Now you can record and hear the music you want. You can record popular tunes right off the air. Then make high-speed copies of songs from your cassette collection onto the same tape. You can even add tracks from the optional CD.

So, just like a sound engineer you'll record your music in the order you want.

## PURE CD SOUND

They're a perfect match. The instant you connect the 'ready-for-digital' portable system to this 3-beam, 16-bit component CD Player, you'll detonate strikingly-detailed CD sound.

And, wait till you hear the 20Hz-20,000Hz frequency response.

You can also con-

nect this CD Player to your main system.

Seiko Instruments' AC/DC (D-cell) powered Portable Component measures 5¼"H. x 19"W. x 4½"D. The AC-powered CD Player measures 3¼"H. x 16½"W x 11"D. Both are backed by standard warranties.

## THRILL TO ONE (OR TWO) AUDIOPHILE COMPONENTS RISK FREE

Capture your favorite AM and FM stereo stations with the accuracy of PLL tuning. Duplicate the songs you want with the electronically-matched dual decks. And, fill your home with CD sound.

If you're not 100% awestruck, simply return it/them to DAK in their original

Here's one of my associates demonstrating the CD player in his home. In the second picture, we (he and I) had fun showing our younger associates how to 'rock out' with the portable AM/FM stereo and dual cassette decks.

boxes within 30 days for a courteous refund.

To order Seiko Instruments' Portable Component System with PLL Digital Tuning, 10 Presets, LCD Station Level Meter, Dual Continuous-Play Dubbing Cassette Decks, CD-Inputs and more with your credit card, call toll free or send your check for DAK's breakthrough price of just \$69<sup>90</sup> (\$6 P&H). Order No. 5651. CA res add tax.

To ADD a 16-Bit Component CD Player with 3-Beam Tracking to your Seiko Instruments' Portable Component (patch cord included) send just \$149<sup>90</sup> for BOTH units. (\$9 P&H). Order No. 5689.

Wait till you hear your AM and FM stereo broadcasts, studio-perfect cassette copies and detailed CD sound. It's a great portable on the patio or in the park. And, it's a great main system at home or your office. ☐

The dynamics of CD sound are incredible. You'll hear the resonance of a blues saxophone or the cannon blasts of the 1812 Overture with equal clarity. And, just wait till you experience the phenomenal frequency response.
