

Best Best Ever

It's simply the best 2-line or 1-line phone this writer has ever used. From its elegant good looks to its elegant sounding speakerphone, it's a class act. And, it remembers and dials up to 200 numbers by THE NAME of the person you want to call. WOW! Plus, for the first time, it's **ON SALE!**

By Drew Kaplan

It's the best best. I've never used a telephone that does more or does it as well.

Here's an all new name dialing 2-line conferencing speakerphone that will revolutionize your concept of telephones.

As president of DAK, I've tested hundreds of phones. Some are very good and you will find them in DAK's catalog. But, I've never used a better sounding, more useful phone, at home or at the office, than the phone pictured here. Let me tell you some of the reasons why.

Just enter the NAME once and this amazing two-line phone automatically dials the number for you.

FIRST, IT DIALS BY NAME

I hate having to remember phone numbers. With this phone, all I do is push the 'H' button when I want to dial Home. The 'D' button dials DAK. And, the 'I' button dials my insurance broker.

Most other dialers make you remember location numbers, such as '26' for Mom. So, you're really just substituting one number for another. Now, all you need to remember is the person's name.

It's so easy. Simply scroll through the names, or enter in the first 3 letters. So, if I want to dial Howard instead of home, I simply push 'H', 'O', 'W'.

Simply program in the numbers you frequently call. To dial your bank's branch office, just touch 'B'.

It's quick, it's easy and you'll never have to remember or look up and dial anyone's number again. Each memory location can hold up to 32 digits and you can store up to 200 different names. It has a memory capacity of 4096 digits.

You can store your Sprint and MCI codes with the person's name, in a separate location that the phone automatically accesses as it dials, or separately so that you can

You can even program internal business numbers. To call your company's credit department just touch 'C'.

automatically access the service and then dial a number manually.

And, speaking of manual dialing, you don't even have to push the speakerphone button to dial. When you touch the first number on the dial, the phone automatically seizes the line, turns on its speaker, and you have on-hook dialing.

So, you never have to lift the receiver or activate the speakerphone unless someone answers the line.

FORGOTTEN HANDSET?

This incredible phone has the latest K2 handset. It gives you traditional Phone Company fit and feel. Plus, I find it even more comfortable to use.

Just touch 'M' to dial 'Mom'.

Just touch 'D' for Dentist, 'A' for Accounting, or 'J' for Jack. Now you can speed-dial up to 200 numbers just by entering in their NAME. You'll never have to remember or look up anyone's number again.

But, you'll probably never use it. The speakerphone is so powerful, so clean, and so easy to use, you'll never pick up the handset unless you need privacy.

I've used good speakerphones before, but this speakerphone's sound quality rivals an 'in-person' conversation. It's simply the best speakerphone I've ever used.

2-LINE MASTERPIECE

You can select Line 1 or Line 2. And, you can push 'Conference' to combine both lines for conference calling. There are LEDs that show which line is 'In Use', 'On Hold', or 'Ringing'. And, each line rings differently.

Installation is a breeze. It simply plugs into one standard modular 2-line jack or two modular 1-line jacks. Nothing could be easier. Just plug it in.

PAGES OF HELPFUL FEATURES

The list of features would have to be microfilmed to fit on this page. There's a large LCD display that shows you the name you want to call and the number.

An automatic timer tells you exactly how long you've been talking. And, a clock appears on the display whenever you hang up.

Every conceivable feature from Mute to Tone/Pulse Switching, to Pause, to Flash, to Battery Backup (2 C batteries included), to three direct Emergency Memory Keys and more is included.

There's even Automatic Redial which redials a busy number every 30 seconds.

BEAUTY AND BRAUN

I usually prefer function to form, but when you look at the sleek, swept back, silver-grey appearance, and when you examine its complete computer keyboard, you'll understand why it would warm even a Hi-Tech enthusiast's heart.

My heart is warmed by what it does, but I

must admit its appearance is impressive.

It's 9½" wide, and backed by the manufacturer's standard limited warranty.

PUT NAME DIALING ON YOUR LINE RISK FREE

It's the best sounding speakerphone I've ever heard. Dialing by names instead of numbers is a quantum leap in both technology and convenience. **Note: If you don't have two line service, just use one of its lines. It's great.**

If you're not 100% convinced, as I am, that this is the best-sounding, most convenient phone you have ever used, simply return it in its original box to DAK within 30 days for a courteous refund.
