**HOME, OFFICE AND ON THE ROAD!**

# Mobile Message Interceptor

*Capture your important phone messages at home, at the office and even when you travel. Even though this miniaturized industrial answering machine/dictation system was designed for travel, with its pure DIGITAL out-going message, call-screening, beeperless remote and MUCH more, it's the ideal home and office answering machine.*

By Drew Kaplan

It's incredibly small. But, it delivers a megaton payload of communication power.

Cobra has packed all the power of a fully-remote, DIGITAL answering machine AND a dictation system into a portable system that fits easily in your briefcase.

It was designed for heavy-duty office use, and for traveling executives to take on the road, so its extra-dependable, extra-rugged design is perfect for use in your home, office and home office, too.

### ANSWERING FREEDOM TO GO

When I go to trade shows to look for new products, I always get important phone calls while I'm out of my hotel room.

Sure, the hotels will take messages. But, quite often, I get incomplete messages or just a name and number. On top of that, I usually get back to my room after business hours, when it's too late to return calls.

Well, no more. The Mobile Message Interceptor has all the power (and more) of old-fashioned, full-sized answering machines, but it's the size of a paperback book.

Plug it into any modular phone jack (most hotel rooms have them) and you're

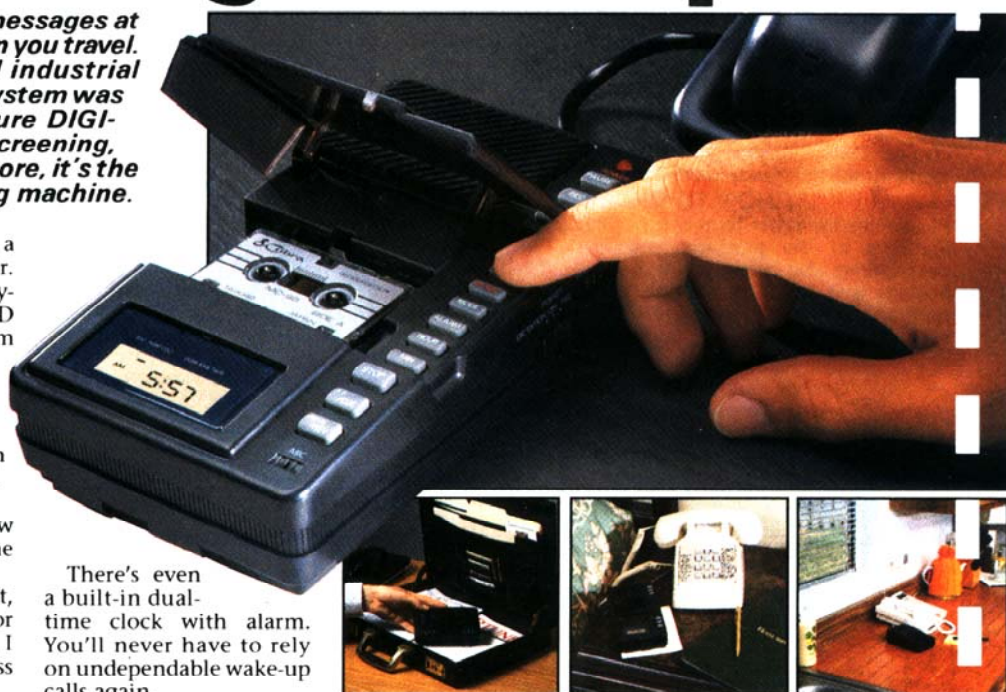

The LCD display shows you the number of messages and what time you received them.

in business. The multi-function LCD display tells you how many messages you've received (up to 99 messages) and even what time you received them.

It has beeperless remote message retrieval. You can retrieve your messages from any touch-tone phone and return calls anytime of the day, without returning to your home, office or hotel room.

Plus, the built-in dictation system instantly captures your ideas and even records memos and letters anywhere you go.

And, it's AC/DC (AAA batteries not included). You can use the dictation system in your car, on trains and on planes.

There's even a built-in dual-time clock with alarm. You'll never have to rely on undependable wake-up calls again.

### INDUSTRIAL POWER FOR YOUR HOME AND OFFICE

The Interceptor is loaded with all the features you'd expect on a full-size answering machine. In fact, I use one in my home office. Here's just a sample of the power you'll command:

- Digital Out-Going Message—It's CD-quality sound. A built-in microchip actually digitally records your voice for incredibly clear personalized messages.
- Call Screening—You'll know who's calling before you answer. You can take the call, or have the machine take it for you.
- Voice-Activated Recording (VOX)—It records only as long as your caller speaks, so you won't have to listen to blank spaces.
- Remote Turn-On—In case you forget to turn it on (as I often do), you can call and activate it from anywhere.

It measures just 1 7/8" H. x 3 1/2" W. x 6 1/8" D. and weighs only 13 ounces. It's manufactured by Cobra and backed by their stan-
